github.com/n3lab

Moscow, Russia
n3laboratory@gmail.com

Education

2003 — 2004

Bauman Moscow State Technical University
Aerospace Faculty, Applied Mathematics

Technical Skills

Swift, Cocoa Touch, RESTful APIs, Design patterns, SOLID, CocoaPods, Git, iTunes Connect

Work Experience

I would like to present myself as a iOS developer. I have mainly been finding my clients through [Upwork](https://www.upwork.com/) (freelance website) and I am looking to reach out and find more. As to date, I have developed both apps with server-side backend and standalone presentation apps with strong graphics effects. To see some of my work please visit portfolio.n3deep.com/en.

Side Projects

- [Smilik](#) — game, similar to the Magic 8-Ball from the film "Interstate 60".
- [SayToBuy](#) — app, that helps to create shopping lists via voice.
